

Waste Paper are accepted in accordance with DSTU 3500: 2009

Grade	Composition
MC-1A	Waste of recycling of unpigmented white paper with 100 percent bleached pulp without printing and ruling without laminated, lacquered, waxy and other cover and without impregnation (synthetic resins, paraffin, wax, fat-like substances, etc.): printing paper, drawing, writing, drawing and other types of white paper without cores.
MC-1A-2	Waste of recycling of white paper with 100 percent bleached pulp, particularly pigmented, without printing and ruling without laminated, lacquered, waxed or other cover and without impregnation (synthetic resins, paraffin, wax, fat-like substances, etc.): printing paper, drawing, writing, drawing and other types of white paper without cores.
MC-2A-1	Waste of recycling of white paper, varying in composition, with ruling or without it (except newsprint), pigmented without cover, without cover and impregnation (synthetic resins, paraffin, wax, fat-like substances, etc.) and without lamination.
MC-2A-2	Waste of recycling of all kinds of white paper, except newsprint, with ruling, colored strip (print size not more than 20% surface area), in particular with pigmented cover, but without cover and impregnation (synthetic resins, paraffin, wax, fat-like substances, etc.) and without lamination.
MC-3A	Wastes from the production, processing and use of products of unbleached pulp: paper: for corrugating (fluting); packaging; electroinsulating without cover and impregnation; twine; cartridge; sack; abrasive basis; basis for adhesive tape; board: for flat layers of corrugated cardboard (kraft liner) and other types; punch cards; paper twine and other types. Waste from production of non water-resistant paper bags without tarred impregnation layer and reinforced layers).
MC-4A	Used non water-resistant paper bags (without tarred impregnation layer and reinforced layers).
MC-5Б-1	Wastes from the production, processing and use of corrugated cardboard and corrugated packaging of unbleached pulp.
MC-5Б-2	Wastes from the production and recycling of corrugated cardboard of different raw materials and corrugated structure, which was not in use.
MC-5Б-3	Corrugated cardboard and packaging of all kinds with or without printing after use.
MC-6Б-1	Waste of recycling of cardboard of bleached pulp without printing.
MC-6Б-2	Waste of recycling of cardboard of bleached pulp with black-and-white and color printing.
MC-6Б-3	Waste of processing and use of cardboard of all types (except electroinsulating with impregnated and roofing and shoe cover), in particular with the black-and-white and color printing.
MC-7Б-1	Wastes from the production of printing industry: scrap, books, magazines, brochures, catalogs and other products rimless; unsold books, magazines, brochures, catalogs, note pads, exercise books, note books, posters and other printed materials and stationery paper products, which are published in the white paper, except newsprint, with monochrome and color printing, without solid glued frames, casements, covers and roots.

MC-7Б-2	Used books, magazines, brochures, catalogs, notebooks, note pads, pocketbooks, posters and other types of printed materials and paper products that are issued on white paper, except newsprint, with monochrome and color printing, without solid glued frames, casements, hard covers and roots.
MC-8B-1	Waste of recycling of newsprint without printing.
MC-8B-2	Waste of newsprint with printing and unrealized newspaper circulation.
MC-8B-3	Newspapers used.
MC-9B	Paper and cardboard cores, spool, bushing (without rods and tubes, without cover and impregnation).
MC-10B	Cast articles of paper pulp.
MC-11B	Waste of processing and use of paper and cardboard of various kinds and colors except black and brown: for sanitary purposes, cover, light-sensitive, in particular, the flap on the devices or printers, duplicating machines, display, wallpaper (without cover), bursting, bobbin, filter etc.
MC-12Г	Wastes from the production, processing and use of paper, cardboard and corrugated cardboard with impregnation and cover, covering wet-resistant, laminated, glued with special adhesives; paper bags, paper made from these species; electricinsulating paper and paperboard, with impregnation and cover, wallpaper with cover, books, magazines, printed on the varnished paper.
MC-13Г	Wastes from the production, processing and use of paper and cardboard of black and brown colors, paper copier, paper for computer technology, pigmented and primed paper, roofing felt, etc.
MC-14Г	Waste of banknote paper and banknotes, worn banknotes.
